

AITOR QUILEZ HERRERO

FULL-STACK DEVELOPER · REACT / DJANGO / C# / POSTGRESQL · AI & LLM INTEGRATION

Zaragoza, Spain | +34 651 313 339 | aitorquilez@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Developer who delivered production systems at Zebra Ventures with React, Django, C# and PostgreSQL, including microservices with Claude API (LLM) integration and database optimization at 10M+ row scale. Currently designing and building Blothor, a self-directed portfolio of 8 SaaS products, defining shared architecture, infrastructure, and go-to-market strategy end to end. Completing a Higher Technician degree in Multiplatform Application Development (DAM, UNIR) in May 2026. Backed by 20 years in technical process roles (quality control, laboratory diagnostics, cross-functional coordination), bringing rare workplace maturity, analytical rigor, and ownership to engineering teams. Now seeking a full-time Full-Stack / AI-integration role, open to remote and hybrid.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Design

Backend: Python, Django, Django REST Framework, FastAPI, C#, .NET Core, Bash

Database: PostgreSQL, MySQL, SQL Query Optimization, Database Design, Supabase

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Docker Compose, CI/CD, Linux, Agile/Scrum, Coolify, Hetzner

AI / LLM: Claude API, Prompt Engineering, Web Scraping, Autonomous Agents, Workflow Orchestration

Mobile: Kotlin, Jetpack Compose, MVVM

Other: AWS (basics), OOP, Rust (basics), Tauri, Unity (basics)

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Zebra Ventures, Zaragoza *Apr 2026 – Jul 2026*

- Developed full-stack applications end to end: C# .NET backends, React frontends, PostgreSQL databases.
- Architected a microservices system with workflow orchestration and LLM integration (Claude API) for autonomous investor research.
- Built autonomous web scraping pipelines and optimized PostgreSQL queries on datasets exceeding 10M rows.
- Set up CI/CD pipelines and collaborated in an agile, sprint-based environment (code review, pair programming).

Chemical Specialist / Clinical Laboratory Technician — Rolabo Outsourcing, Nurel S.A., Saica S.A., Teva Pharmaceuticals, IQE, Laboratorios Herrera, Hospital San Juan de Dios *2005 – 2026*

- 20 years of process optimization, quality control, and cross-functional team coordination across chemical and clinical laboratory environments.
- Led project management, process automation, and continuous-improvement initiatives with measurable quality outcomes.
- Built strong foundations in data analysis, structured problem-solving, and regulatory/QA discipline — directly transferable to software QA and engineering rigor.

FEATURED PROJECTS

Enterprise CRM with Autonomous Startup Search — Zebra Ventures · Production

Microservices architecture for investor research automation: autonomous web scraping, Claude API analysis, PostgreSQL optimization (10M+ rows), workflow orchestration.

Tech: Django, React, PostgreSQL, Claude API, Microservices, Docker, CI/CD.

Full-Stack CMS Web Application — Zebra Ventures · Production

Enterprise Content Management System with authentication, role-based access, real-time sync, and a full CI/CD pipeline with automated testing.

Tech: Django, React, TypeScript, PostgreSQL, Docker, GitHub Actions.

Blothor — Personal SaaS Product Portfolio — *Founder & Full-Stack Developer · In Development*

Designed and built a self-funded portfolio of 8 web/desktop products under a unified brand, shared design system, and common infrastructure strategy (Docker, Coolify, Hetzner, Traefik). Defined go-to-market priorities and a cross-product production-readiness checklist (CI/CD, testing, monitoring, GDPR compliance).

Tech: Next.js, React, Supabase, PostgreSQL, FastAPI, Python, Rust/Tauri, Docker.

- **Control de Clases (Flagship, 75%)** — Booking and class-management SaaS for studios/academies; real-time sync, subscription billing model (Stripe integration in progress). Tech: Next.js 14, Supabase, PostgreSQL.
- **Blothy** — AI agent with persistent memory, core differentiator across the product line. Tech: FastAPI, Python, Claude API.
- **Safe** — Local-first encrypted password vault, one-time-purchase model. Tech: Rust, Tauri, React.

AN — Autonomous Startup Analysis Agent — *Personal Project · Completed*

AI-powered autonomous system for web research, data aggregation, and investment-recommendation generation, with advanced agent orchestration via Claude API.

Tech: Python, Claude API, Autonomous Agents, Web Scraping, JSON Processing.

LYZER — Web Research & Data Extraction Tool — *Personal Project · Completed*

Research tool with concurrent multi-provider search (5 providers), hybrid memory (ChromaDB + SQLite), a 15-point scoring system, and retry/error-handling logic.

Tech: Python, Web Scraping, ChromaDB, SQLite, Multi-provider APIs.

Arete Dance Studio — PWA — *github.com/Thorqui/arete-dance-studio · Live on Vercel*

Real-time booking and management platform for dance studios; responsive PWA with real-time database sync, authentication, and class scheduling.

Tech: React, Supabase, PostgreSQL, Vercel, Real-time APIs, PWA.

Retrofit API REST — Android App — *github.com/Thorqui/Retrofit-API_REST*

Android application with MVVM architecture, Jetpack Compose UI, REST API integration (Ghibli API), Coroutines, and image caching.

Tech: Kotlin, Jetpack Compose, MVVM, Retrofit, Coroutines, Material Design 3.

Docker App 2.0 — *github.com/Thorqui/DockerApp_2.0*

Multi-container application with Nginx frontend, Flask API backend, and Docker Compose orchestration, following DevOps and production-deployment best practices.

Tech: Nginx, Flask, Python, Docker Compose, Container Networking.

Additional projects on GitHub: *Claude-line (autonomous system framework), Download Organizer (Python CLI & GUI), Brain Puzzle (JavaScript game).*

EDUCATION & CERTIFICATIONS

- Higher Technician in Multiplatform Application Development (DAM) — UNIR | 09/2024 – 06/2026
- AI Development Course — BIG School
- Cisco Networking Academy (Netacad / Credly), 2025 — Linux, Python, JavaScript, HTML
- Senior Laboratory Technician for Clinical Diagnosis — F.P.E. Marco
- Senior Technician in Chemical Process Industries — I.E.S. Itaca

LANGUAGES

Spanish: Native English: Intermediate–Professional, actively improving technical vocabulary

CORE COMPETENCIES

Technical Leadership & Documentation · Analytical Problem-Solving · Learning Agility · Agile Mindset · Cross-functional Collaboration · Clear Technical & Business Communication · QA Awareness & Testing Mindset · DevOps & Cloud Thinking · Product Strategy & Ownership
