

AITOR QUILEZ HERRERO

JUNIOR SOFTWARE DEVELOPER | DAM STUDENT |
CAREER TRANSITION TO TECH

PROFESSIONAL PROFILE

Versatile and proactive professional transitioning into the tech industry after 15+ years in cross-sector environments. Skilled in teamwork, project management, and problem-solving, I am currently developing expertise in Multiplatform Application Development (DAM), Python, JavaScript, Front-End and Back-End development, Cloud, CI/CD, and automated testing. Passionate about innovation, digital transformation, and Agile practices, I am eager to apply my transferable skills to contribute to impactful technology projects within dynamic and collaborative tech teams.

HARD SKILLS

- Mobile development: Kotlin, Jetpack Compose
- Languages: Python, JavaScript, Java, SQL
- Cloud (under development) AWS
- Other technologies: HTML5, CSS3, Unity
- Data Bases: MySQL, PostgreSQL...
- Version control: Git, GitHub
- Tools and concepts: Linux, Agile methodologies, OOP

FEATURED PROJECTS

DOCKER APP

https://github.com/Thorqui/DockerApp_2.0

- Static web application served with Nginx on the frontend and a Flask backend exposing an API, all orchestrated with Docker Compose.
- *Technologies:*
 - Frontend -> HTML5, CSS3, Nginx
 - Backend -> Python 3.10, Flask, Flask-CORS
 - Docker containerization -> Docker Compose
 - Documentation -> Markdown (README.md), Structured Guides

BRAIN_PUZZLE

https://github.com/Thorqui/Brain_Puzzle

- An addictive online puzzle game that combines the logic of Lights Out with Stoic wisdom.
 - Objective: Change the entire board to a single color (white or black) in the fewest moves.
- *Technologies:*
 - Frontend -> HTML5, CSS3, JavaScript
 - Backend -> None (static single-file app)
 - DevOps & Deployment -> Git, GitHub Pages
 - Responsive Design -> CSS Media Queries, Mobile-First

DOWNLOAD ORGANIZER

https://github.com/Thorqui/Script_Files

- v1.0: CLI script to organize downloads with --verbose and --list-others options.
- v2.0: Enhanced GUI (Tkinter) with folder selection and logging to log_organizador.txt.
 - Ideal for file organization: CLI for terminal users, GUI for visual experience.
- *Technologies:*
 - Frontend -> Tkinter, Python GUI, Native Desktop UI
 - Backend -> Python 3.10+, argparse, logging, colorama, os/shutil/pathlib
 - DevOps & Packaging -> PyInstaller, --onefile, --windowed, Git, GitHub
 - Cross-Platform -> Windows (.exe), Linux (native binary), macOS (source)
 - Command Line Interface -> Bash, CLI Arguments, Terminal Output
 - Documentation -> Markdown (README.md), Structured Guides

ACADEMIC BACKGROUND AND TECH CERTIFICATIONS

-

WORK EXPERIENCE (TRANSITION TO TECH)

2005 – 2025

Chemical Specialist / Clinical Laboratory Technician

Companies:

Rolabo Outsourcing, Nurel S.A. Saica S.A., Teva Pharmaceuticals, IQE, Laboratorios Herrera, Hospital San Juan de Dios

- Experience in programming, operation, and maintenance (preventive and corrective) of production machinery.
- Process management, data analysis, and problem-solving for process optimization and quality control.
- Implementation of improvements and coordination of cross-functional teams to ensure goal achievement.
- Project management, personnel supervision, and effective interdepartmental communication.

SOFT SKILLS

- Software Fundamentals & Technical Documentation
- Analytical Thinking / Problem-Solving
- Learning Agility / Quick Adaptation (Agile Mindset)
- Teamwork / Cross-functional Collaboration
- Communication Skills (Technical & Collaborative)
- Commitment, Reliability & Continuous Improvement
- Exposure to Cloud Concepts, DevOps Practices & QA Awareness

Languages:

- Spanish - Native
- English: Professional proficiency - continuously improving and focused on technical vocabulary

Interests:

- **Technology and Development:** Continuous learning, software development, DevOps culture, emerging technologies, open source, logic challenges, Raspberry Pi projects
- **Other interests:** Innovation, digital transformation, sports and fitness, animals, exploring the world and different cultures
