

AITOR QUILEZ HERRERO

FULL-STACK DEVELOPER | ZEBRA VENTURES | REACT •
DJANGO • C#

PROFESSIONAL PROFILE

Full-Stack Developer with 3 months professional experience at Zebra Ventures.
Expert in React, Django, C#, PostgreSQL. Building scalable systems with
LLM integration and database optimization. Completing DAM degree May 2026.
15+ years in process management, now applying to tech innovation

HARD SKILLS

- Backend: Python • C# • Django • Django REST Framework • .NET Core • SQL • Bash
- Frontend: React • TypeScript • JavaScript • HTML5 • CSS3 • Responsive Design
- Database: PostgreSQL • MySQL • SQL Query Optimization • Database Design
- DevOps & Tools: Git • GitHub • Linux • Docker • Docker Compose • CI/CD • Agile • GitHub Actions
- AI/LLM & Specializations: Claude API • Prompt Engineering • Web Scraping • Workflow Orchestration
- MobileVersion control: Kotlin • Jetpack Compose
- Other: AWS (basics) • OOP • Unity (basics)

FEATURED PROJECTS

Enterprise CRM with Autonomous Startup Search

Zebra Ventures | Production

Microservices architecture for investor research automation.

Autonomous web scraping, Claude API analysis, PostgreSQL optimization (10M+ rows), workflow orchestration.

Tech: Django • React • PostgreSQL • Claude API • Microservices • Docker • CI/CD

Full-Stack CMS Web Application

Zebra Ventures | Production

Enterprise Content Management System with authentication, role-based access, real-time sync, and CI/CD pipeline. Production-grade platform with comprehensive testing.

Tech: Django • React • TypeScript • PostgreSQL • Docker • GitHub Actions • Testing

AN — Autonomous Startup Analysis Agent

Personal Project | Completed

AI-powered autonomous system performing web research, data aggregation, and investment recommendation generation. Advanced agent orchestration with Claude API.

Tech: Python • Claude API • Autonomous Agents • Web Scraping • JSON Processing

LYZER — Web Research & Data Extraction Tool

Personal Project | Completed

Intelligent research tool with advanced search (5 concurrent providers), hybrid memory (ChromaDB + SQLite), 15-point scoring, error handling & retry logic.Tech: Python • Web Scraping • ChromaDB • SQLite • Multi-provider APIs

Arete Dance Studio — PWA GitHub:

github.com/Thorqui/arete-dance-studio | Live: Vercel

Real-time booking & management platform for dance studios. Responsive PWA works on all devices. Real-time database sync, authentication, class scheduling.

Tech: React • Supabase • PostgreSQL • Vercel • Real-time APIs • PWA

Retrofit API REST — Android App GitHub:

github.com/Thorqui/Retrofit-API_REST

Modern Android application with MVVM architecture, Jetpack Compose UI, REST API integration (Ghibli API), Coroutines, image caching. Professional mobile patterns.

Tech: Kotlin • Jetpack Compose • MVVM • Retrofit • Coroutines • Material Design 3

Docker App 2.0 GitHub:

github.com/Thorqui/DockerApp_2.0

Multi-container application with Nginx frontend, Flask API backend, Docker Compose orchestration. DevOps best practices and production deployment patterns.

Tech: Nginx • Flask • Python • Docker Compose • Container Networking

Additional Projects Available:

- Claude-line (Autonomous System Framework)
- Download Organizer (Python CLI & GUI v1.0 & v2.0)
- Brain Puzzle (JavaScript Game - Live: thorqui.github.io/Brain_Puzzle)

ACADEMIC BACKGROUND AND TECH CERTIFICATIONS

- Higher Technician in Multiplatform Application Development (DAM) | UNIR | 09/2024-Present
- AI development course | BIG School
- Linux Cisco 2025 | Netacad // Credly
- Python Cisco 2025 | Netacad // Credly
- JavaScript Cisco 2025 | Netacad // Credly
- HTML Cisco 2025 | Netacad // Credly
- Senior laboratory technician for clinical diagnosis | F.P.E. Marco
- Senior technician in chemical process industries | I.E.S. Itaca

WORK EXPERIENCE

Full-Stack Developer Zebra Ventures | Zaragoza | 2026 (Current – 3 months)

- Developed full-stack applications: C# .NET backends, React frontends, PostgreSQL databases
- Architected microservices systems with workflow orchestration and LLM integration (Claude API)
- Implemented autonomous web scraping, database optimization (10M+ rows), CI/CD pipelines
- Collaborated in agile environment (sprint-based development, code review, pair programming)

Chemical Specialist / Clinical Laboratory Technician

Multiple companies (Rolabo Outsourcing, Nurel S.A., Saica S.A., Teva Pharmaceuticals, IQE, Laboratorios Herrera, Hospital San Juan de Dios) | 2005–2026

- 20 years of process optimization, quality control, and team coordination
- Project management, process automation, and cross-functional leadership
- Background: Data analysis, problem-solving, continuous improvement

SOFT SKILLS & CORE COMPETENCIES

- Technical Leadership & Documentation
- Analytical Problem-Solving & Critical Thinking
- Learning Agility & Quick Adaptation
- Agile Mindset (Scrum/Sprint-based)
- Cross-functional Collaboration & Teamwork
- Clear Technical & Business Communication
- Commitment to Quality & Continuous Improvement
- DevOps & Cloud Thinking
- QA Awareness & Testing Mindset

Languages:

- Spanish - Native
- English - Intermediate. Professional proficiency - continuously improving and focused on technical vocabulary

Interests:

- Technology and Development:** Software Development • DevOps Culture • Open Source • Emerging Tech • Logic Challenges • Raspberry Pi Projects
- Other interests:** Innovation • Digital Transformation • Sports & Fitness • Travel & Cultures
